**Leaflet Description**

This leaflet provides spare parts information for Otis One ePAL Emergency Personnel Lobby Panel. The ePAL Emergency Personnel solution is used as required by IBC 2018 and ASME A17.1 2019 to communicate with potential trapped passengers in an elevator via voice, video, and text. This device is used for cases where the emergency responding parties can communicate with a potential trapped passenger via voice, video, and text from a command center inside of the same building as the potential trapped passenger. This device is required for buildings with 60ft rise or greater.

**About Spare Parts Leaflets...**

This document lists the lowest replaceable units (LRUs) for the standard version of the product. The LRUs are chosen by a team of Otis associates representing engineering and manufacturing.

While goal of this document is to make parts identification as easy as possible, the document cannot be all-inclusive. Elevator and escalator contracts classified as “special” or “custom” are not addressed here. For such contracts, please refer to specified information, the contract folder, TIPS, Field Education Articles, Construction Letters, etc. for further information.

If you have any suggestions about this document, please contact the subject matter expert listed on this page.
